OS: Windows 11 | Windows 10 | Windows 7 | Linux
Language: Python | PowerShell (foundational) | SQL | Java | C++ | JavaScript | VBA
Software/Tools: Microsoft 365 | Teams | SharePoint | Jira | Git | Docker | Zoom | Unifi | Cisco Meraki | Mist

Experience

IT Specialist , Weee! Inc – Belleville, NJ April 2024 - Dec 2024

- **Administered Microsoft 365 within an Azure/Hybrid infrastructure**, supporting enterprise users across **Exchange Online, Teams, SharePoint Online, and OneDrive**
- Managed **user lifecycles and access provisioning,** including account setup, device onboarding, and collaboration access for new hires and role changes Administered and troubleshot endpoint devices, including laptops, PDAs, printers, and mobile devices
- Managed **identity and access workflows in Azure Entra ID**, including user lifecycle management, role-based access, and secure authentication configurations
- Partnered with IT Security to implement and support **Multi-Factor Authentication (MFA) and Conditional Access policies**
- **Administered endpoint management via Microsoft Intune (MEM)**, enforcing device compliance, patching, firmware updates, and secure mobile device access to Exchange
- Delivered **Tier 2 infrastructure support** for M365 cloud services and endpoints, performing **Root Cause Analysis (RCA)** and implementing corrective action plans
- Supported **endpoint governance and device compliance** across Windows laptops, PDAs, and mobile devices, including patching and firmware updates
- Supported **change, configuration, and incident management** processes, documenting work and resolutions using Jira

IT Support / College Programming Tutor, CUNY – Bayside, NY Sept 2019 - April 2024

- Assisted IT teams with **system administration and application support** across Windows-based environments
- **Automated routine M365 user audits and mailbox reporting using PowerShell**, improving audit readiness and reducing manual administrative effort
- Developed automation scripts using **PowerShell and Python** to streamline operational and administrative workflows
- Created **technical and non-technical documentation**, including system procedures, troubleshooting guides, and user-facing instructions
- Supported secure handling of institutional data in alignment with **organizational and regulatory compliance requirements**

Care Management Coordinator , MJHS – Manhattan, NY Sept 2025 - Present

- Managed **sensitive member and operational data** in a **strictly regulated environment**, ensuring compliance with **federal and state data protection standards**
- Applied regulatory requirements and organizational policies to daily operations, supporting **100% compliance with privacy and security controls**
- Maintained accurate records within secure enterprise systems, demonstrating strong attention to **data governance, audit readiness, and quality assurance.**

Projects

DeShop (Shop Mockup) https://shop.nauhc.dev/

- Using the Fetch API to dynamically retrieve items and display them on the shop subpage through React Router, this project has been Optimized with React and Styled Components. Each page has been meticulously crafted, and the design is mobile-friendly as well. Also Configured with a custom subdomain.

MTA GTFS-RT Viewer — Real-Time Transit Data Web App https://github.com/Chuan-Chen/mta-gtfs-rt-viewer

- Developed a React-based web application that consumes and visualizes MTA GTFS-RT (real-time transit) data, displaying live vehicle and service updates. Implemented real-time data fetching, parsing, and UI updates using modern JavaScript to ensure accurate, responsive transit information.

Education

Queens College – BA in Computer Science December 2023
Queensborough Community College – AS in Computer Science and Information Security December 2020
